F-Class Kitchen Fire Extinguishers

Reliable Backup Fire Protection
Provide dependable and superior backup to your automatic fire suppression system with the ANSUL® F-CLASS (European) Liquid-Agent Fire Extinguisher designed to protect commercial cooking equipment.

Extra Protection from Kitchen Fires
Newer, more efficient cooking appliances, plus the use of non-saturated cooking oils, require a fire extinguishing agent that will smother a fire and provide a cooling effect. The low pH fire extinguishing agent of the F-CLASS fire extinguisher is a specially-formulated aqueous solution developed to provide rapid flame suppression and securement of hot fuels such as combustible vegetable oils or animal fats.

The F-CLASS fire extinguisher is provided for hazards where there is the potential for fires involving commercial cooking equipment such as are found in restaurants, cafeterias, bakeries and other food service facilities.

Additional product features include simple operation and maintenance, an easy-to-read pressure gauge, an extended discharge range up to 5 m (16 ft.) and a swirl effect multi-purpose nozzle. The extinguisher is rechargeable and meets the requirements of the European standard for portable extinguishers (EN3) and the Pressure Equipment Directive (PED) – CE marked product.

The F-CLASS Liquid Agent Fire Extinguisher (European) provides dependable and superior backup to an automatic fire suppression system. This extinguisher is designed to protect commercial cooking equipment with a low pH fire extinguishing agent that provides rapid fire suppression and securement of hot fuels such as combustible vegetable oils or animal fats.

Meets the requirements of EN3 and PED for use on fires involving commercial cooking equipment.
Provides dependable and superior backup to an automatic fire suppression system
