RED LINE Mobile Application
Quick-Start Guide

With the new RED LINE Mobile Application, you can...

- Quickly and easily generate a list of premium ANSUL® RED LINE fire extinguishers to fit your needs

- Target specific industries and their corresponding fire hazards

- Display and distribute detailed model specifications

- View an informative video about RED LINE fire extinguishers

- Link to Authorized ANSUL Distributors offering RED LINE products

How does the RED LINE Mobile Application work?

There are two ways to generate a list of RED LINE hand portable and wheeled extinguishers . . .

1) Using the "Product Finder" tool, select the appropriate Industry, Application and Fire Size. Then tap "SUBMIT" to generate a list of appropriate models based on your selection.

OR

2) Select the hand portable or wheeled extinguisher option to display a list of the available models. (Depending on your device, tap on the icon or drop-down list.)

From your selections, tap on an individual model to display a page containing the model name, image and detailed specifications. With a WiFi connection, you can email one or more of the selected specification pages directly from the app.

You can also opt to play an informative video, Tough Fires Call for Tougher Response, or locate an Authorized ANSUL Distributor online.
